

Big Bale Stacker

COLLECTS LARGE BALES FROM THE PADDOCK AND PLACES INTO A NEAT STACK.

Big Bale Stacker

Do you need to get hay off the paddock quickly and efficiently?

The Big Bale Stacker Collects bales between the two grab arms on the front of the Stacker, using in-cab fingertip hydraulic control functions. The bale is tipped up by the 'first table' and placed onto the main table, where it gently slides down the tray to the end of the Stacker. After collecting a stack of bales, the Stacker tips the tray up and places the bales into a neat stack.

ROBUST SIMPLE DESIGN

UNIQUE PLASTIC COVERED TRAY TO ASSIST HAY SLIDING ON THE BED BUILT IN AUSTRALIA TO SUIT AUSTRALIAN CONDITIONS WILL PICK UP BALES IN ANY DIRECTION

FEATURES

- Adjustable drawbar height to suit different tractors
